

## **Application for Early Career Researcher (ECR) project funding at the ARCCSS**

Funding is available for ARCCSS ECRs (including postgraduate students and research fellows) to lead small projects that extend beyond the scope of their research programs.

These projects should be aimed at providing ECR leadership opportunities and should also benefit the ARCCSS in some way. Examples of possible projects include, but are not limited to:

- Organising small workshops
- Leading a research collaboration across nodes
- Developing and/or running an outreach activity
- Developing a communication strategy for a publication

To apply for funding, please complete the following application form and submit to your node representative on the ARCCSS ECR committee. See the ECR committee website for a current list of representatives. <https://www.climatescience.org.au/ECR-committee>

Applications will be assessed by the committee in terms of budget and likely outcomes and forwarded to the ARCCSS executive group for final approval.

**Application for ARCCSS ECR project funding**

Name(s):

Institution(s):

Project description, goals and time frame (200 words max):

Project budget and rationale (100 words max):

How will the proposed project provide leadership opportunities to the ECR? (100 words max):
